

# Payne

Size A 52 | B 39 | ED 56 | DBL 20 | TMP 145  
GKM

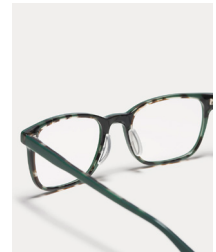

BCTO  
BLACK CREAM TORTOISE

CTAR  
CREAM TORTOISE/  
ACTIVE RED

DKTO  
DARK TORTOISE

FCTO  
FOREST CREAM  
TORTOISE

## TECH SPECS

The Article One Active Optical Collection was created to extend the same ethos and design sense of our Active sun collection into the optical category. For this new collection, we are using a new innovative material called GKM, a polymer plastic that has many characteristics making it more desirable than typical optical frames made from acetate. This new material, proprietary to our factory, is lighter, more flexible, and more scratch resistant than acetate, making it the perfect material to use for our Active Optical collection. Along with the innovative frame material, we have designed and developed new Active nose pads specific for this collection, which accomplish the same grip as our sunglasses while remaining hidden and discrete on smaller optical frames. The Active Optical frames are completed with high quality spring hinges and engraved ridges on the temple tips to assist with grip. Every innovative and thoughtful addition creates a frame that can be worn from the start of the day to the end and every activity in between

## Philosophy:

Payne is the frame that is rarely noticed, blending in with every style and every context. This is the frame for the athlete that is perhaps reluctant to wear glasses, but happily throws these subtle frames on for any activity.

## Features:

Rectangle shape  
Adjustable Performance Nosepads  
Saddle Bridge  
Spring Hinges
