## MINNESOTA LINGO

Native to 44 lakes and 8 rivers, the Muskellunge is one of the largest and most elusive fish in Minnesota. The largest member of the Pike family, the only predators are humans and Bald Eagles. The name has evolved over time but originates from the Ojibwe words maskinoše or mashkinonge ("big Pike" or "ugly fish") and maashkinoozhe ("great fish"). In December of 2021, an angler braved the frozen tundra of Lake Mille Lacs to make a new state weight record, pulling a 55lb 14oz Muskie from the icy depths below.
